**NRC INSPECTION REPORT NO. 50-261/94-14, NOTICE OF DEVIATION**

Gentlemen:

NRC Inspection Report 50-261/94-14, which was transmitted by letter dated June 3, 1994, identified a Notice of Deviation involving the failure to include in performance test procedures, provisions for testing and test acceptance criteria which are consistent with the commitments contained in the Updated Final Safety Analysis Report. The letter transmitting this Notice of Deviation requested a reply within 30 days of the date of the Notice. As agreed to during a telephone conversation between Mr. Paul Byron (NRC) and Mr. W. J. Dorman (CP&L) on July 1, 1994, an extension of 15 days was granted to ensure that the causes for the deviation are identified and appropriate actions are initiated. It is our understanding that questions regarding this matter will be discussed during a meeting at the NRC Region II office on July 26, 1994.

Should you have any questions regarding this matter, please contact Mr. R. M. Krich at (803) 383-1802.

Very truly yours,

for C. S. Hinnant  
Vice President
