

Carolina Power & Light Company

Raleigh, North Carolina 27602

October 17, 1969

Mr. Paul Collins
Chief, Operator Licensing Branch
Division of Reactor Licensing
Atomic Energy Commission
7920 Norfolk Avenue
Bethesda, Maryland

Dear Mr. Collins:

To insure that the training and utilization of operators during pre-operational testing will proceed in an orderly and planned manner, it is requested that the cold examinations for H. B. Robinson Plant operators be scheduled in advance of formal applications. For planning purposes, the following dates are proposed:

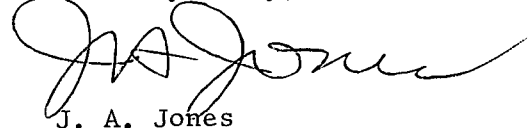

Week of February 1, 1970 - Administer written examination
Week of March 29, 1970 - Conduct operating - oral examination

Normal, abnormal and emergency operating procedures will be forwarded to your office as they are approved starting about November 1, 1969. Our intentions are to have a complete set in your hands by January 1, 1970.

It is believed that this basic licensing examination schedule will adequately support the scheduled core loading date of mid April, 1970.

Please let us know if Carolina Power & Light Company can plan on the above schedule.

Yours very truly,

J. A. Jones
Manager - Power Supply
