**H. B. ROBINSON STEAM ELECTRIC PLANT, UNIT NO. 2**  
**DOCKET NO. 50-261/LICENSE NO. DPR-23**  
**COMMITMENT FOR FUTURE LICENSE AMENDMENT REQUEST**

Gentlemen:

On March 3, 1993, Carolina Power & Light (CP&L) Company requested a revision to the Technical Specifications (TS) for the H. B. Robinson Steam Electric Plant (HBRSEP), Unit No. 2. The proposed revision would add an additional methodology to the list of approved methodologies for the Core Operating Limits Report (COLR) contained in TS 6.9.3.3.b (i.e., ANF-88-133(P), "Advanced Nuclear Fuels' PWR Design Methodology for Rod Burnups of 62 GWD/MTU," approved by NRC on September 9, 1991), and would provide certain clarifications and corrections.

The NRC has requested that CP&L revise the amendment request to TS 6.9.3.3 to require that the analytical methods used to determine the core operating limits shall be reviewed and approved by the NRC, and the approved revision number shall be identified in the COLR. CP&L is planning to submit an additional revision request to TS 6.9.3.3 in the Fall of 1994, to support the Cycle 17 reload and commits to include the requested change in that license amendment request.

Questions regarding this matter may be referred to Mr. K. R. Jury at (803) 383-1363.

Very truly yours,

R. M. Krich  
Manager - Regulatory Affairs
