H. B. ROBINSON STEAM ELECTRIC PLANT, UNIT NO. 2  
DOCKET NO. 50-261/LICENSE NO. DPR-23  
NOTIFICATION OF INTENT TO CONVERT THE  
PLANT SPECIFIC TECHNICAL SPECIFICATIONS TO  
THE IMPROVED STANDARD TECHNICAL SPECIFICATIONS

Gentlemen:

This letter is to provide notification of our intent to convert the current H. B. Robinson Steam Electric Plant (HBRSEP), Unit No. 2 Technical Specifications (TS) and Bases to the improved "Standard Technical Specifications - Westinghouse Plants," NUREG-1431, Volumes 1, 2, and 3, Revision 1, April 1995. We have recently completed an evaluation of such a conversion, and the evaluation findings with respect to improved operator and plant staff understanding of TS requirements as well as cost savings clearly support proceeding with this effort.

Our current plans are to implement the improved TS during startup from the next (i.e., 17th) refueling outage during the Fall of 1996. Accordingly, we expect to submit our TS conversion change request in March, 1996 in order to allow sufficient time for NRC review and approval. We intend to notify the NRC of any future necessary changes to this planned schedule.
