ON-SITE EMERGENCY POWER SYSTEMS

Dear Mr. Schwencer:

On June 3, 1977, the NRC staff requested that Carolina Power & Light Company commit to plant modifications to comply with the staff positions on on-site emergency power systems. In a letter dated August 3, 1977, CP&L committed to designing required modifications and to submitting a description of the design and any required Technical Specification changes to the NRC at least 60 days prior to the installation of the modifications. The design is now complete, and a description of it is attached for your information. The modification is scheduled to be installed during the May, 1979, refueling outage. At present, it appears that no Technical Specification changes are required. If, however, during the installation of the modification any changes are identified, they will be submitted to you in a timely manner.

Yours very truly,

E. E. Utley
Senior Vice President
Power Supply
