REVISION TO QUALITY ASSURANCE PROGRAM

Dear Mr. Denton:

Our letters of March 30, 1977, June 22, 1977, and September 14, 1977, clarified the position taken in the Carolina Power & Light Company Quality Assurance Program for the Robinson and Brunswick facilities. Mr. Robert Reid's letter of January 31, 1978, indicated your concurrence with these clarifications.

Carolina Power & Light Company's March 14, 1979, response to IE Report 50-324/325-79-02, Item E, stated that we would retract our previous position on Paragraph 5 of our March 30, 1977, letter. This letter is submitted as stipulated.

Paragraph 5 of the March 30, 1977, letter is restated as follows:

5. Radiation survey/measuring instruments utilized for determination of emanating/airborne radioactivity, as required for personnel safety, and chemical/radiochemical analysis instruments shall be calibrated/maintained in accordance with Section 6, Calibration Control, of the Carolina Power & Light Company Corporate Quality Assurance Manual, Part 2 - Operations.

This restatement is submitted as a revision to our Quality Assurance Program in accordance with our March 14, 1979, letter. Please advise us of your acceptance.

Yours very truly,

E. E. Utley
