IN-SERVICE TESTING PROGRAM FOR PUMPS AND VALVES

Dear Mr. Schwencer:

On August 5, 1977, Carolina Power & Light Company (CP&L) submitted to the NRC staff the H. B. Robinson Unit 2 In-Service Inspection Program as required by Title 10 CFR50.55a. On October 25, 1978, CP&L submitted a revised inspection program as a result of comments generated by members of your staff at a meeting held with CP&L on August 22 and 23, 1978.

The inspection interval for the pump and valve testing program commenced on November 7, 1977, and expires July 7, 1979. In accordance with the proposed changes to 10CFR50.55a, published in the Federal Register on January 18, 1979, CP&L requests to be allowed to continue our present pump and valve inspection program until the end of a 120-month cycle which will end March 7, 1981. The present program was conditionally accepted by your staff on October 14, 1977.

The pump and valve testing program is being conducted in accordance with Subsections IWP and IWV of Section XI of the 1975 edition of the ASME Boiler and Pressure Vessel Code through the Summer 1975 Addenda, except for specific relief which has been requested in our previous submittals.

Yours very truly,

E. E. Utley  
Senior Vice President  
Power Supply
