NRC RADIATION SAFETY TRAINING COURSE AT ORAU

Dear Mr. Gammill:

Carolina Power & Light Company (CP&L) received your letter dated October 2, 1979 on October 29, 1979. Carolina Power & Light Company agrees that the course of study outlined in your letter provides an adequate substitution for our basic radiation safety course. It is our opinion that your staff members would have to participate in a fairly short, less than one hour, special site-specific orientation program and successfully complete the normal site health physics examination. Annual reexamination would be required at each plant site to comply with existing procedures.

If this program is to be implemented, we request that you give us as much notice as possible, preferably three months, so that we may prepare and distribute the special orientation programs for use by your staff.

Yours very truly,

E. E. Utley

Executive Vice President
Power Supply and Customer Services
