LICENSE NO. DPR-23  
NUREG 0737, ITEM II.D.1.2  
"RELIEF AND SAFETY VALVE TEST REQUIREMENTS"

Dear Mr. Varga:

In the Carolina Power & Light Company (CP&L) response to Generic Letter 82-10, dated June 9, 1982, we stated that we anticipated the submittal of the H. B. Robinson Unit No. 2 (HBR) plant-specific report on the final evaluation of relief and safety valve performance and operability by October 1, 1982.

In a letter dated September 17, 1982, the vendor notified CP&L that the report would not be transmitted to CP&L until after the scheduled date for submittal to your office. According to the vendor's revised schedule, we anticipate submitting the HBR plant-specific report on the final evaluation of relief and safety valve performance and operability by November 1, 1982.

Based on reassurance from the vendor, we anticipate that the remaining two NUREG-0737 Item II.D.1 reports dealing with the block valve test program and the plant-specific evaluation of relief and safety valve piping/support adequacy will be submitted, as previously described in our letter of June 9, 1982, on November 1, 1982, and December 15, 1982, respectively.

If you have any questions regarding this matter, please contact my staff.

Yours very truly,

L. W. Eury  
Senior Vice President  
Power Supply
