NUREG-0737 TECHNICAL SPECIFICATIONS

Dear Mr. Eisenhut:

Carolina Power & Light Company (CP&L) has reviewed Generic Letter No. 83-37 dated November 1, 1983 concerning NUREG-0737 Technical Specifications and provides the following schedule for submission of the requested Technical Specifications. Carolina Power & Light Company plans at this time to submit all requested Technical Specifications within 90 days of receipt of the Generic Letter as you requested. The reactor coolant system (RCS) vent system will not be fully functional until after the Steam Generator Replacement Outage which is scheduled to begin in July 1984. Therefore, submittal of Technical Specifications for the RCS vents for HBR2 within 90 days of receipt of your letter along with the remainder of the Technical Specifications will not impact plant safety.

If you have any questions on this subject, please contact a member of the Nuclear Licensing staff.

Yours very truly,
