IN-SERVICE INSPECTION PROGRAM

Dear Mr. Varga:

Carolina Power & Light Company hereby transmits the revised In-Service Inspection and Test Program for Pumps and Valves for the H. B. Robinson Steam Electric Plant Unit No. 2 (HBR2). This revision incorporates items discussed during telephone conferences with your staff and contractor on October 7, 1983 and November 8, 1983.

This revision supersedes, in total, our previous submittals of March 10, 1981, December 31, 1981, and December 9, 1982. Revisions are noted by bars adjacent to the change. It should also be noted that the Plant Operating Manual at HBR2 has been reformatted. This has resulted in changing the procedure numbering system. A cross-reference table between the old procedure numbers, as used in this submittal, and the new procedure numbers is available onsite for your review if necessary.

If you have any further questions on this subject, please contact a member of our Nuclear Licensing Staff.

Yours very truly,

S. R. Zimmerman
Manager
