DOCKET NO. 50-261/LICENSE NO. DPR-23  
ADDITIONAL INFORMATION REGARDING CORE OPERATING  
LIMITS REPORT (COLR) LICENSE AMENDMENT REQUEST

Gentlemen:

The purpose of this letter is to provide additional information regarding a license amendment request to implement a COLR at H. B. Robinson Steam Electric Plant, Unit No. 2 (HBR2). This information was discussed in conference calls between Carolina Power & Light Company (CP&L) and the NRC on December 11, 1991; January 22, 1992; and January 23, 1992.

Attachment 1 to this letter is the example COLR. This document was inadvertently omitted from the transmittal of our license amendment request dated January 7, 1991.

Attachment 2 is a copy of the July 8, 1986 cover letter documenting the NRC approval of two documents, XN-NF-85-16(P) and XN-NF-85-105(P), which are referenced in the proposed Technical Specification 6.9.3.3.b.g.

Attachment 3 is an excerpt from the May 30, 1975 letter documenting the NRC approval of WCAP-8301, which is referenced in the proposed Technical Specification 6.9.3.3.b.n.

Attachment 4 provides replacement Technical Specification pages for CP&L's January 7, 1991 submittal. Page 6.5-7 contains changes related to the issuance of License Amendment 138, which are unrelated to the COLR request. Pages containing Technical Specification 6.9.3.3.b have been changed to incorporate a parenthetical notation of the Technical Specification impacted by each approved methodology under each individual reference. Technical Specifications 6.9.3.3.b.1 and 6.9.3.3.b.2 have been combined. Also, a typographical error in proposed Technical Specification 6.9.3.3.b.n has been corrected.

Finally, the NRC questioned the clarity of Technical Specification 3.10.2.1, which states in part that: " $F_{\Delta H}$  is the measured  $F_{\Delta H}$ , including a 1.04 measurement uncertainty," and suggested more specific wording which more clearly delineated the difference between  $F_{\Delta H}$  and  $F_{\Delta H}^N$ . CP&L commits to clarify this terminology in a future amendment request which affects this section of the Technical Specifications.
