CP&L NUCLEAR IMPROVEMENT PLAN

Dear Mr. Ebnetter:

Attached are Carolina Power & Light Company's Corporate Improvement Initiatives that we committed to provide to you by November 30, 1992. The Brunswick Integrated Startup plan and the most recent revision of the Brunswick Unit 2 startup schedule are also being submitted to you, today, by separate letter (Serial: BSEP 92-0046).

The Company's Corporate Improvement Initiatives are designed to contribute to the improvement in performance and safety of CP&L's nuclear plants. Our objectives include: (1) improving CP&L's corporate nuclear organizations so that they become more focused on efficiently and effectively supporting the nuclear plants, (2) implementing programs that will better train our people and challenge them for higher performance and greater safety awareness, and (3) upgrading our work planning and control processes to improve the material condition of our nuclear units. We are also establishing a Nuclear Safety Oversight Committee reporting to management and the Board of Directors and a Nuclear Safety Review Committee at each nuclear plant site, all of which will include outside nuclear experts as members. These committees will assist management in developing a higher level of safety awareness at the nuclear sites and a stronger appreciation for the importance of setting and meeting standards that will lead to superior performance.

We are committed at CP&L to achieving and maintaining excellence in nuclear operations. Development of these Corporate Improvement Initiatives, as well as the improvement plans at the Brunswick Nuclear Project, are important steps in that direction. We still have a great deal of work to do to meet our goals. We realize sustained improvement will require changing the way things have been done in the past. Some changes are already taking place; others will result from these initiatives and from the improvement program underway at the Brunswick Plant.

Significant resources are being dedicated to the success of these initiatives and the achievement of our goals. Improvement of our nuclear program has the support of all levels of management at CP&L. We will closely monitor our progress and make improvements when necessary.

We will keep you and your staff fully informed as to the status of these initiatives and of work at the Brunswick Plant. If you would find it helpful, we would be pleased to meet with you on a monthly basis, or any other frequency that you desire, to discuss our progress on these initiatives. If you have any questions or suggestions, please let us know.

Yours very truly,

William Cavanaugh III
