CLARIFICATION OF RESPONSE TO SUPPLEMENT NO. 1 TO GENERIC LETTER 87-02  
(NRC TAC NOS. M69478, M69433, AND M69434)

Gentlemen:

Carolina Power & Light Company (CP&L) received evaluations of the 120-day response to Supplement No. 1 to Generic Letter 87-02 for the H. B. Robinson Steam Electric Plant, Unit No. 2 (HBR2) and the Brunswick Steam Electric Plant, Unit Nos. 1 and 2 (BSEP1&2). These evaluations were dated November 19, 1992 and November 23, 1992 for HBR2 and BSEP1&2, respectively.

In the evaluations, the NRC raised a concern whether CP&L will implement both the Seismic Qualification Utility Group (SQUG) commitments and the implementation guidance; and if not, what will be CP&L's process for notifying the NRC of deviations? With regard to this concern, CP&L actions will be in accordance with Part I, Section 1.3 of the Generic Implementation Procedure (GIP), Revision 2 (corrected February 14, 1992), which was accepted in the Supplemental Safety Evaluation Report dated May 22, 1992.

Should you have any questions regarding this issue, please contact Mr. F. A. Emerson at (919) 546-7573.

Yours very truly,

David C. McCarthy  
Manager
