H. B. ROBINSON STEAM ELECTRIC PLANT, UNIT NO. 2
DOCKET NO. 50-261/LICENSE NO. DPR-23

LARGE-BREAK LOSS OF COOLANT ACCIDENT ANALYSIS

Gentlemen:

The purpose of this letter is to provide a correction to the Large-Break Loss Of Coolant Accident (LOCA) Analysis submittal supplied to the NRC for the H. B. Robinson Steam Electric Plant, Unit No. 2 (HBR2) via letter dated April 3, 1992, Serial No. NLS-92-080. The fuel vendor, Siemens Nuclear Power Corporation, supplied a reanalysis of the postulated LOCA to conservatively bound Cycle 15 and Cycle 16 operating conditions. The Siemens report, EMF-91-237, was inadvertently supplied with an incorrect cover page which was marked as proprietary. Carolina Power & Light Company (CP&L) hereby informs the NRC that the information contained within the subject Siemens report does not contain proprietary information and is not required to be withheld from public disclosure in accordance with 10 CFR 2.790(b).

Questions regarding this matter may be referred to Mr. R. E. Stirling at (919) 546-2502.

Yours very truly,

David C. McCarthy

Manager
