TELEPHONE CONFERENCE OF MAY 3, 1990, REGARDING LICENSEE EVENT REPORT 90-005

Gentlemen:

On the afternoon of May 3, 1990, a telephone conference was conducted at the request of the NRC Region II staff with the staff of H. B. Robinson Unit 2 (HBR2). The subject of this discussion was Licensee Event Report (LER) 90-005, "Failure to Test RPS Logic Channels in Accordance with Technical Specifications," dated April 2, 1990. This submittal documents verbal commitments made to the NRC Region II staff during the subject telephone conference.

As stated during the discussion, HBR2 had previously been scheduled to begin a brief maintenance outage on May 4, 1990. As agreed to in the discussion, the following commitments will be completed prior to returning the reactor to a critical condition from this scheduled maintenance outage:

1. Testing of reactor protection logic channels, including source and intermediate range channels, will be performed in accordance with existing plant procedures.
2. The Plant Nuclear Safety Committee will meet to address compliance with Technical Specifications requirements and confirm that no outstanding nuclear safety issues exist.
3. A determination will be made regarding the scope of the Technical Specification Table 4.1-1, Item 27. If relief is required or if enhancements are needed, these will be pursued in an expeditious manner.

4. A determination will be made as to the need for submittal of a supplement to LER 90-005. Included in this scope will be a determination as to the need for additional corrective actions to confirm that no similar conditions exist.

The site resident NRC inspector will be kept current regarding the progress of the above commitments, and any further corrective actions or developments which may arise.

Should you have any questions concerning this matter, please contact Mr. J. D. Kloosterman at (803) 383-1491.

Very truly yours,

R. E. Morgan
