H. B. ROBINSON STEAM ELECTRIC PLANT UNIT NO. 2  
DOCKET NO. 50-261  
LICENSE NO. DPR-23  
REQUEST FOR LICENSE AMENDMENT  
ENVIRONMENTAL SPECIFICATIONS (NON-RADIOLOGICAL)

Dear Mr. Schwencer:

In accordance with the Code of Federal Regulations, Title 10, Part 50.90 and Part 2.101, Carolina Power & Light Company (CP&L) hereby submits proposed Environmental Specifications (Non-Radiological) for its H. B. Robinson Steam Electric Plant. It is our intention that these specifications be a separate appendix to the operating license.

These specifications are submitted in response to requests made by the NRC staff and the Atomic Safety and Licensing Board during the review of CP&L's request to increase the rating of the H. B. Robinson core to 2300 Mwt. That uprating request was granted in June, 1979 with the understanding that CP&L would submit these specifications at a later date. It is our understanding that since these specifications are being submitted in support of that request, no license fee is required.

If you have any questions on this matter, please contact our staff.

Yours very truly,

E. E. Utley  
Executive Vice President
