LICENSE AMENDMENT FOR RADIOLOGICAL EFFLUENT SPECIFICATIONS

Dear Mr. Varga:

In accordance with the Code of Federal Regulations, Title 10, Part 50.90 and Part 2.101 and as requested by your staff, proposed Specifications for the H. B. Robinson Plant Unit No. 2 Radiological Effluent and Environmental Monitoring Systems are attached as Enclosure 1. Changes to existing Technical Specifications are indicated by a vertical line in the left-hand margins of the affected pages. As indicated on the Table of Contents page, Sections 3.9 and 4.10 will be deleted upon implementation of this amendment. It is our intention that the Radiological Effluent Specifications be a separate License Amendment and Condition. It is our understanding that since this amendment was required by your staff, no license fee is required.

By letter dated June 2, 1980, the NRC transmitted comments on Carolina Power & Light (CP&L) Company's proposed Radiological Effluent and Environmental Monitoring Technical Specifications submitted May 31, 1979. CP&L's responses to these comments are included as Enclosure 2 of this letter.

Enclosure 3 of this letter contains the H. B. Robinson Unit No. 2 Process Control Program for solidification of radioactive wastes as requested by the NRC on June 2, 1980.
