SUBJECT: Exercise Report for the October 6, 1987, Exercise  
of the Offsite Radiological Emergency Preparedness  
Plans for the H. B. Robinson Nuclear Power Plant

Attached is one copy of the Exercise Report for the October 6, 1987, full participation joint exercise of the offsite radiological emergency preparedness plans for the H. B. Robinson Nuclear Power Plant. The plant is located approximately 5 miles northwest of Hartsville, South Carolina. The State of South Carolina, and Chesterfield, Darlington, and Lee Counties, which are located in the 10-mile plume emergency planning zone, participated in this exercise. The exercise report, dated January 6, 1988, was prepared by Region IV of the Federal Emergency Management Agency (FEMA) and includes the comments resulting from the Regional Assistance Committee review.

There were no deficiencies identified as a result of this exercise. The report identifies five areas requiring corrective action in Section III, as well as several areas recommended for improvement in Section IV. FEMA Region IV staff will furnish a copy of this exercise report to the State of South Carolina and request a schedule of corrective actions. Region IV will assure completion by the State of the necessary corrective actions.

Based on the results of the exercise, the South Carolina State and local offsite radiological emergency plans and preparedness remain adequate to provide reasonable assurance that appropriate measures can be taken offsite to protect the health and safety of the public in the event of an accident at the H. B. Robinson Nuclear Power Plant and the 44 CFR 350 approval granted on December 28, 1981, remains in effect.
