H. B. ROBINSON STEAM ELECTRIC PLANT, UNIT NO. 2  
DOCKET NO. 50-261/LICENSE NO. DPR-23  
GENERIC LETTER 89-06 SPDS CERTIFICATION  
RESPONSE SCHEDULE

Gentlemen:

This letter documents agreements reached with Dr. R. Lo (NRR Project Manager for H. B. Robinson, Unit 2) per telephone conversation with Carolina Power & Light Company (CP&L) on June 26, 1989 concerning the schedule for response to Generic Letter 89-06.

Generic Letter 89-06 provided all licensees with specific review criteria and directed them to submit certain information regarding the implementation status of their Safety Parameter Display System (SPDS) within 90 days of the April 12, 1989 GL issue date (due July 11, 1989).

During the period of June 13 to 16, 1989, NRC reviewers performed an audit of the HBR2 SPDS system. The audit findings were generally quite favorable, however, some possible enhancements to the system were identified for potential implementation. The NRR auditor specifically directed CP&L to address these audit items within the pending response to GL 89-06. Upon further review of these items, it has become apparent that appropriately detailed responses cannot be developed and incorporated into the GL 89-06 response in order to support the original July 11 due date.

In subsequent discussion of the situation with the NRR Project Manager, it was agreed that an extension of the response date to August 15, 1989 would be appropriate to allow for inclusion of the recently identified audit issues.

If there are any questions concerning this issue, please contact Mr. R. W. Prunty at (919) 546-7318.

Yours very truly,

L. I. Loflin  
Manager
