RADIOLOGICAL EFFLUENT & ENVIRONMENTAL MONITORING  
TECHNICAL SPECIFICATIONS

Dear Mr. Varga:

On June 2, 1980, you transmitted NRC comments on our proposed Radiological Effluent Technical Specifications which we submitted on May 31, 1979. In your letter you invited us to discuss your comments with your staff if we felt a need to do so. Representatives from my staff met with your staff on July 1, 1980 for this purpose. We believe the discussions we had were very beneficial towards finalizing our Radiological Effluent Technical Specifications on the next submittal.

As a result of our discussions with your staff, some additional time is needed to complete the analytical and engineering work identified to allow a complete submittal. Your staff indicated they would prefer to receive a complete submittal at some time in the future, rather than a partial submittal now, which would only generate further discussions. Therefore, we plan to submit revised Radiological Effluent Technical Specifications by October 22, 1980, which we believe will adequately address your questions.

As discussed in the July 1, 1980 meeting, my staff will communicate with your staff to resolve further questions as they arise in the development of our submittal in order to expedite the resolution of this issue.

Yours very truly,

E. E. Utley  
Executive Vice President  
Power Supply and  
Engineering & Construction
