ADJUSTMENT OF LICENSE AMENDMENT APPLICATION FEE

Dear Ms. Diggs:

This is in response to your February 11, 1981 letter which requested that an additional fee of \$10,800 be remitted to NRC regarding our September 26, 1980 technical specification change request.

This September 26, 1980 submittal proposed changes relating to the H. B. Robinson Unit No. 2 decay heat removal system, the lockout of ECCS valves, and the minimum water level required during refueling operations. We remitted a fee of \$1200 for a Class II amendment because we determined that the requested changes were administrative in nature. However, your letter advised us that NRC's preliminary review had determined that our application involved consideration of three separate safety issues. This would require three Class III fees totaling \$12,000. Therefore, as you requested, we are herewith remitting a check for the balance of \$10,800.

If your final review reflects that these fees are incorrect, please advise us of the appropriate adjustment.

Yours very truly,

E. E. Utley
