REQUEST FOR LICENSE AMENDMENT -  
SURVEILLANCE REQUIREMENTS

Dear Mr. Varga:

Summary

In accordance with the Code of Federal Regulations, Title 10, Part 50.90 and Part 2.101, Carolina Power & Light Company (CP&L) hereby requests revisions to the Technical Specifications for the H. B. Robinson Steam Electric Plant (HBR) Unit 2. These revisions involve changes to Table 4.1-1 of Section 4.1 and will adopt the frequency notations provided in the Standard Technical Specifications and correct an omission in Amendment 59 to HBR's Technical Specifications.

Details

The existing legend to Table 4.1-1 "MINIMUM FREQUENCIES FOR CHECKS, CALIBRATIONS AND TEST OF INSTRUMENT CHANNELS" provides definitions for the various frequency abbreviations used in the table. The specific changes requested will make the abbreviations and their definitions identical to those used in the Standard Technical Specifications. These changes do not lengthen the surveillance frequencies, and the applicable bases will not be affected. The proposed changes will allow the applicable checks, tests and calibrations, which are presently grouped into short time periods, to be scheduled more evenly throughout the year. This will minimize excessive intermittent manpower demands and improve the effectiveness of the calibration program.

For continuity, we have deleted the legend from page 4.1-6, which is identical to the legend on page 4.1-6a. In addition, we noted that the number of the NUREG referenced under \*\*\*\* on page 4.1-6a was omitted in Amendment No. 59. We have inserted the NUREG number for clarity.
