United States Nuclear Regulatory Commission
Washington, DC 20555

H. B. ROBINSON STEAM ELECTRIC PLANT, UNIT NO. 2
DOCKET NO. 50-261/LICENSE NO. DPR-23
SUPPLEMENTAL REQUEST FOR LICENSE AMENDMENT
SURVEILLANCE REQUIREMENTS

Dear Mr. Varga:

SUMMARY

In accordance with the Code of Federal Regulations, Title 10, Parts 50.90 and 2.101, Carolina Power & Light Company (CP&L) hereby requests supplemental revisions to the Technical Specifications (TS) for the H. B. Robinson Steam Electric Plant Unit No. 2 (HBR2). These revisions are as a result of discussions with your staff.

DETAILS

By letters dated October 24, 1983 and December 12, 1983, CP&L submitted a request for license amendment concerning surveillance requirements. During your staff's review, two discrepancies were discovered and discussed with CP&L. We are, therefore, revising and resubmitting the affected pages. One is a typographical error, and the other is a change to the basis of the TS to conform with ASME Section XI.

ADMINISTRATIVE

Since these revisions are supplemental to a previous request and were requested by NRC staff, CP&L has determined that no license amendment fee is required.

The affected pages are attached for your use. Please replace the appropriate pages from our previous submittals with those attached (pages 4.2-3 and 4.2-5). Changes are denoted by vertical bars in the right margin.
