H. B. ROBINSON STEAM ELECTRIC PLANT, UNIT NO. 2
DOCKET NO. 50-261/LICENSE NO. DPR-23
REQUEST FOR LICENSE AMENDMENT - ORGANIZATIONAL CHANGES

Dear Mr. Varga:

SUMMARY

Carolina Power & Light Company (CP&L) hereby requests a revision to the Technical Specifications (TS) for the H. B. Robinson Steam Electric Plant Unit No. 2 (HBR2) in accordance with the Code of Federal Regulations, Title 10, Parts 50.90 and 2.101. This revision is as a result of recent organizational changes at HBR2.

DETAILS

The proposed amendment would change the TS to replace one supervisory position at HBR2 with two. The position of Manager - Operations and Maintenance has been split into two positions: Manager - Operations and Manager - Maintenance to allow more dedicated management over both the operation and maintenance functions. The responsibilities of the previous position have been divided between the two new positions. Figure 6.2-2 and Specifications 6.4.1 and 6.5.1.6.2 have been revised to reflect this organizational change. In addition, page 6.5-7 has been revised to include an organizational change approved by Amendment 84 that was inadvertently deleted by Amendment 85.

SIGNIFICANT HAZARDS DETERMINATION

Carolina Power & Light Company has reviewed this request and has determined that the proposed TS revisions involve no significant hazards considerations because the proposed organization changes are purely administrative in nature; for example, a change to achieve consistency throughout the TS, correction of an error, or a change in nomenclature. The amendment request is similar to the Commission's example (i) of the examples of amendments not likely to involve a significant hazards consideration (see example (i) in 48 FR 14870, April 6, 1983).
