REVISED TECHNICAL SPECIFICATION PAGE - FIRE PROTECTION
CONDITIONS OF LICENSE AND TECHNICAL SPECIFICATIONS

Gentlemen:

On February 21, 1992, Carolina Power & Light Company requested a revision to the H. B. Robinson Unit No. 2 (HBR2) Technical Specifications (TS). The proposed change would replace the current license condition regarding fire protection with a standard condition and delete Fire Protection TS, consistent with the guidance of Generic Letters 86-10 and 88-12. This request is still under staff review.

In the interim, on July 15, 1992, Amendment 141 was issued for the HBR2 TS to allow the use of a Core Operating Limits Report. This amendment independently changed a page which is still under staff review for our February 21, 1992 request. Enclosure 1 provides revised TS page 6.5-7 which reflects the change issued with Amendment 141, as well as the proposed changes in our February 21, 1992 submittal, and should be substituted for the corresponding page in our original request.

Please refer any questions regarding this submittal to Mr. J. S. Kozyra at (919) 546-7924.

Yours very truly,

R. B. Starkey, Jr.
