POST TMI REQUIREMENTS CONTAINED IN NUREG-0737

Dear Mr. Eisenhut:

As requested by your staff in telephone conversations held February 19 and 26, 1981, Carolina Power & Light Company (CP&L) hereby forwards clarifications to its commitments made in our December 15, 1980 letter concerning NUREG-0737, "Clarification of TMI Action Plan Requirements" items for H. B. Robinson. Responses to issues raised by your staff are listed below:

1. Item II.D.1.3 - Relief and Safety Valve Test Requirements - Block Valve Testing

As stated in our December 15, 1980 letter, CP&L is a participant in the EPRI valve testing program. CP&L has worked closely with EPRI to develop a program plan and schedule for the Block Valve Testing Program. CP&L, however, cannot commit to a schedule for submittal of that program plan until that schedule is approved by EPRI and the other participants. CP&L will attempt to expedite the submittal but cannot presently commit to a firm submittal date.

2. Item II.F.2.3 - Instrumentation for Detection of Inadequate Core Cooling - Install Level Instruments

As requested by the NRC, CP&L will provide the required documentation for the proposed system at H. B. Robinson by March 31, 1981.

P

3. Item III.A.2.2 - Emergency Preparedness - Meteorological Data

As stated in our December 15, 1980 letter, CP&L is still not in receipt of all the criteria required to develop our implementation schedule and plan for this item. Most notably, we have not yet received the final version of NUREG-0696, "Functional Criteria for Emergency Response Centers." CP&L, however, will commit to provide our plans for implementation within sixty (60) days of receipt from the NRC of the finalized version of NUREG-0696.

If you have any further questions on this subject, please contact our staff.

Yours very truly,

*M A M. Utley*  
for E. E. Utley
