REQUEST FOR ADDITIONAL INFORMATION -
ADEQUACY OF STATION ELECTRIC DISTRIBUTION SYSTEM VOLTAGE

Dear Mr. Varga:

By letter of January 13, 1981, you requested additional information to enable you to continue your review of the adequacy of the H. B. Robinson Unit No. 2 electrical distribution system.

As you are aware, this issue is closely related to the issue concerning degraded grid voltage. Carolina Power & Light Company (CP&L) has responded to your concerns regarding degraded grid voltage and your staff has issued a safety evaluation report closing this issue. Due to the similarity in these issues, and the repetition of questions previously answered and used in the Staff's safety evaluation, CP&L is somewhat confused by your recent questions in light of our responses made to resolve the degraded grid voltage concern. We believe that a meeting between your Staff and CP&L is necessary in order to clarify what information is needed by your Staff, so that we can direct our resources more efficiently in resolving any concerns you may have. In order to avoid conflicts with the upcoming emergency planning drill at H. B. Robinson, it is requested that this meeting be held the week of March 14 or 21. We will contact the NRC Project Manager to arrange a specific date for the meeting.

Yours very truly,

for E. E. Utley
Executive Vice President
Power Supply and
Engineering & Construction
