IN-SERVICE INSPECTION AND TEST PROGRAM

Dear Mr. Varga:

Carolina Power & Light Company (CP&L) is herewith transmitting to NRC three (3) copies of the revised In-Service inspection and Test Program (ISI Program) for the H. B. Robinson Steam Electric Plant, Unit No. 2 (HBR-2). This submittal is made in compliance with 10CFR50.55a(g). The program is being updated to ASME Boiler and Pressure Vessel Code, Section XI, 1977 Edition with addenda through the summer, 1978, addenda.

The updated ISI Program will be applicable for the second 120-month interval beginning March 7, 1981. CP&L intends to implement the new program effective April 1, 1981 which is the beginning of the second quarter of 1981. Requirements for the second quarter will be met by July 1, 1981. Plant technical specification requirements which are more conservative than the ISI Program will be followed in lieu of the ISI Program requirements.

The requirements of the component inspection portion of the ISI Program for the first interval will be completed at the next refueling outage currently scheduled for the fall of 1981. The component inspection program to be conducted during the second interval will be developed and submitted prior to January 1, 1982.

Yours very truly,

*E. E. Utley*  
for E. E. Utley  
Executive Vice President  
Power Supply and  
Engineering & Construction
