H. B. ROBINSON STEAM ELECTRIC PLANT UNIT NO. 2  
DOCKET NO. 50-261  
LICENSE NO. DPR-23  
CONTROL OF HEAVY LOADS AT NUCLEAR POWER PLANTS

Dear Mr. Varga:

By letter dated May 19, 1981, Carolina Power & Light Company (CP&L) advised you that certain interim actions for the control of heavy loads would not be completed for H. B. Robinson until June 5, 1981. As you are aware, the H. B. Robinson plant staff is currently involved in a steam generator inspection program which has significantly expanded in scope from the planned inspection. As a result, the individuals responsible for reviewing and commenting on the work related to the control of heavy loads are not available. Accordingly, we have determined that we will be unable to complete the interim actions before July 8, 1981. Also, the additional information requested by the NRC by June 22, 1981 depends in part on completion of the interim actions. We have determined we are unable to provide this additional information before August 7, 1981.

If you have any questions concerning this subject, please contact my staff.

Yours very truly,

E. E. Utley

Executive Vice President  
Power Supply and  
Engineering & Construction
