January 25, 1982

Mr. Don H. Beckham
Acting Chief
Operator Licensing Branch
Division of Human Factor Safety
U.S. Nuclear Regulatory Commission
Washington, D. C. 20555

SUBJECT: NRC Senior Reactor Operator Examinations for Terrence R. Byron,
Richard T. Garner, Donald W. Knight and Robert A. Steele

Dear Mr. Beckham:

Because the applications for Senior Reactor Operator examinations required a substantial lead time, the four (4) candidates had not completed their simulator evaluation or the final oral and written examination at the time of filing.

This letter is to inform you that the four (4) candidates have satisfactorily completed their final simulator evaluation and the oral and written examination.

The management of Carolina Power & Light Company believes that the above personnel should be allowed to take the examination in order to ensure that a sufficient number of Senior Reactor Operators will be available for plant operation.

If you have any questions, please feel free to call me.

Very truly yours,

B. J. Furr
Vice President - Nuclear Operations
Carolina Power & Light Company
