INSERVICE INSPECTION -  
TEN YEAR HYDROSTATIC TEST PROGRAM

Dear Mr. Varga:

Carolina Power & Light Company (CP&L) is presently proceeding to revise its ten year hydrostatic test program for its H. B. Robinson Steam Electric Plant Unit No. 2 to comply with the requirements of the 1977 Edition, Summer 1978 Addenda of Section XI ASME Code. The existing program is based on the 1974 Edition of Section XI through the Summer 1975 Addenda. The newer code provides more specific instructions for performing tests than does the previous code and therefore will provide for more complete testing.

In accordance with 10CFR50.55a(g)(4)(iv), the incorporation of subsequent editions and addenda is subject to NRC approval. Since Robinson Unit No. 2 is currently scheduled to shut down in March for its 10-year ISI inspections, including hydrostatic testing, your timely consideration of this matter would be appreciated. Should you have any questions, please contact a member of my staff.

Yours very truly,

P. W. Howe  
Vice President  
Technical Services

DCW/lr (910-252)
