H. B. ROBINSON STEAM ELECTRIC PLANT, UNIT NO. 2  
DOCKET NO. 50-261  
LICENSE NO. DPR-23  
NUREG-0737 ITEM II.D.1 "RELIEF AND  
SAFETY VALVE TEST REQUIREMENTS"

Dear Mr. Eisenhut:

NUREG-0737, "Clarification of TMI Action Plan Requirements" as revised by your letter of September 29, 1981, requires Carolina Power & Light Company (CP&L) to provide plant specific submittals on Item II.D.1, "Relief and Safety Valve Test Requirements," by April 1, 1982 for the H. B. Robinson Steam Electric Plant (HBR) Unit No. 2. The submittals are to confirm the adequacy of safety and relief valves based on our preliminary review of the EPRI generic test program results.

Due to a delay in the receipt of the applicable reports on the EPRI PWR Safety and Relief Valve Test Program, CP&L will be unable to complete its preliminary evaluation of this report by April 1, 1982. CP&L is currently working with its consultant to assess the reports as they pertain to HBR Unit No. 2, and will submit its evaluation June 1, 1982. CP&L will notify the NRC promptly if significant problems are encountered.

If you have any questions on this subject, please contact our staff.

Yours very truly,

E. E. Utley  
Executive Vice President  
Power Supply and  
Engineering & Construction
