REQUEST FOR ADDITIONAL INFORMATION  
REACTOR COOLANT SYSTEM VENTS (ITEM II.B.1)

Dear Mr. Varga:

Carolina Power & Light Company (CP&L) has received and reviewed your request for additional information enclosed in your letter dated March 18, 1982.

In light of the extension for implementation of this system as identified in the recent change to 10CFR50.44(c)(3)(iii), to which we have responded in our letter of March 17, 1982, we have determined that we could better address this request for additional information on a schedule consistent with the extension for implementation.

We will provide the information requested at least six months prior to the end of the first refueling beginning after July 1, 1982. This revised schedule should provide sufficient time for NRC Staff review, prior to implementation of the required changes by the end of the subject outage. In any case, the additional information will be provided no later than March 1, 1983.

If you have any further questions, please contact a member of our staff.

Yours very truly,

P. W. Howe  
Vice President  
Technical Services
