H. B. ROBINSON STEAM ELECTRIC PLANT, UNIT NO. 2
DOCKET NO. 50-261/LICENSE NO. DPR-23
REQUEST FOR EXPEDITED LICENSE AMENDMENT
CYCLE 10 OPERATION

Dear Mr. Varga:

On July 23, 1984, Carolina Power & Light Company (CP&L) submitted proposed Technical Specification (TS) revisions for Cycle 10 Operation. Included were changes to TS Section 5.3.1 which describes the design of the reactor core. The changes included revising the total quantity of uranium, the content of the fuel rods and the weight percent of enrichment. Our submittal indicated that criticality was scheduled for October 20, 1984. In order to support the schedule for criticality, fuel load is currently scheduled to commence on September 24, 1984. Therefore, the Section 5.3.1 TS changes are needed in advance of fuel load.

It is requested that previously submitted TS Section 5.3.1 receive expedited review and approval to support a September 24, 1984 fuel load date.

Should you have any further questions on this matter, please call Mr. Stephen Floyd at (919) 836-6901 as they arise.

Yours very truly,

A. B. Cutter - Vice President
Nuclear Engineering & Licensing
