GROUP B
RECORDS BEING RELEASED IN PART

The following types of information are being withheld:

- Ex. 1: ☐ Records properly classified pursuant to Executive Order 12,958
- Ex. 2: ☐ Records regarding personnel rules and/or human capital administration
- Ex. 3: ☐ Information about the design, manufacture, or utilization of nuclear weapons
☐ Information about the protection or security of reactors and nuclear materials
☐ Contractor proposals not incorporated into a final contract with the NRC
☐ Other _____
- Ex. 4: ☐ Proprietary information provided by a submitter to the NRC
☐ Other _____
- Ex. 5: ☐ Draft documents or other pre-decisional deliberative documents (D.P. Privilege)
☐ Records prepared by counsel in anticipation of litigation (A.W.P. Privilege)
☐ Privileged communications between counsel and a client (A.C. Privilege)
☐ Other _____
- Ex. 6: ☐ Agency employee PII, including SSN, contact information, birthdates, etc.
☐ Third party PII, including names, phone numbers, or other personal information
- Ex. 7(A): ☐ Copies of ongoing investigation case files, exhibits, notes, ROI's, etc.
☐ Records that reference or are related to a separate ongoing investigation(s)
- Ex. 7(C): ☐ Special Agent or other law enforcement PII
☐ PII of third parties referenced in records compiled for law enforcement purposes
- Ex. 7(D): ☐ Witnesses' and Allegers' PII in law enforcement records
☐ Confidential Informant or law enforcement information provided by other entity
- Ex. 7(E): ☐ Law Enforcement Technique/Procedure used for criminal investigations
☐ Technique or procedure used for security or prevention of criminal activity
- Ex. 7(F): ☒ Information that could aid a terrorist or compromise security

Other/Comments: Outside of Scope

CURRENT SUMMARY NPI

The MD RHP conducted a limited scope inspection at NPI on 12/30/2009. The inspection included:

1. Interviews with the President, Plant Manager and RSO.
2. Quarterly Environmental Monitoring.
3. Tour of the White House and Property.
4. A review of the status of compliance with the ongoing violations and concerns.

Outside of Scope

Out of
Scope

Status of NPI MARSSIM Survey of White House and Property:

- Completed the scoping survey.
- Identified and removed 7 drums of contaminated soil from the lawn.
- Collected and analyzed 25 soil samples, they need a minimum of 150.
- Plan to complete the MARSSIM Survey by 1/31/2010, weather permitting.
- Plan to remove the contents of White House and survey walls, floors and ceilings.

ONGOING VIOLATIONS

Outside of Scope

Out of
Scope

C.31(c), Amendment 33 and License Condition 22.B(2) NPI exceeds soil concentration limits in the Dry Pond Area.

Outside of Scope

Out of
Scope

D.101 (a) NPI failed to maintain releases of radioactive material to levels as low as reasonably achievable. Contaminated areas of the facility lack adequate containment necessary to prevent uncontrolled releases. Certain release pathways are not continuously monitored.

Outside of Scope

Out of
Scope

ONGOING CONCERNS

Outside of Scope

Out of
Scope

- NPI continues to release radioactive materials into the environment in an uncontrolled manner.

Outside of Scope

Out of
Scope

-  *not of scope*
 Furthermore, NPI still has not implemented corrective actions necessary to comply with ongoing violations regarding soil concentration limits, releases of radioactive material, financial assurance for decommissioning and license termination.

Overview of Current Operations and Regulatory Controls

The manufacturing license MD-31-025-01 (the -01), which was Neutron's primary license for some time:

- was plagued by poor engineering practices and failure to control unsealed cobalt-60 which resulted in an ongoing history of large scale radioactive material contamination in the facility, release of licensed; radioactive material into the local community via a number of environmental vectors, and the additional impact from a phenomenon called radioactive material sky shine due to poor practices in waste storage.

Outside of Scope

out
of
scope

Though these violations are significant, the RHP maintains the position that Neutron's impact on the Dickerson community does not represent an imminent radiation hazard. The merits of this position was confirmed by the NRC, who performed a flyover in 1993 to measure radiation sky shine from the facility during a joint inspection with RHP and by environmental evaluation by EPA and US Surgeon General in August 2002.

Brief Summary of State and Department Actions Against NPI:

Outside of Scope

OUT
OF
SCOPE

SUMMARY OF LAST 10 YEARS OF RADIOACTIVE MATERIAL RELEASE

1. 4/30/97 soil NPI unrestricted areas: activity in unrestricted soils ranged from background to 56 pCi/g. Restricted outside courtyard 1800 pCi/g
2. In 1997 NPI's one-kilometer surveys found seven C-60 particles in the Dickerson community.
3. March 16, 1999 RHP inspection report indicates leaf samples in NPI courtyard up to 7705 pCi/g.
4. July 14, 1999 NOV to NPI outlines RHP concerns with unrestricted soil contamination.
5. August 18, 1999 NPI letter to RHP requesting storage of contaminated soil.
6. December 30, 1999 letter of NPI conducted random inspection with removal of contaminated soil and remediation of contaminated areas.
7. July 11, 2000 example of NPI letter when C-60 found in neighborhood e.g 1.25 uCi distributed in 300 pounds of soil.
8. August 31, 2000 NPI removes 320 uCi of Co-60 from unrestricted stone trap.
9. October 26, 2000 letter to RHP from NPI "Description and Performance of Neutron's Environmental Program."
10. October 31, 2000 letter from NPI routine soil sampling indicating levels of contamination in unrestricted areas.
11. July 26, 2001 NOV to NPI from RHP with range of unrestricted soil contamination of 28-610 pCi/g.
12. August 7, 2001 RHP inspection report defining the above
13. December 7, 2001 NPI results of soil samples
14. March 21, 2002 NOV to NPI defining 10 soil sample results in range between 28-610 pCis per gram.
15. June 27, 2002 memo accident incident file NPI release of Co-60 to public domain via their dumpster.

16. February 23, 2004 RHP inspection report describes 12 soils samples collected by RHP in unrestricted areas that exceed licensee cleanup criteria.
17. NPI 2003 annual report indicates continued uncontrolled radioactive material release into unrestricted areas.
18. NPI 2004 annual report describes finding of Co-60 in neighborhood resident properties and continued uncontrolled release of radioactive material into unrestricted areas.\
19. NPI 2005 annual report indicates continued uncontrolled radioactive material release into unrestricted areas.
20. November 2005 RHP inspection report describes 6 soil samples in unrestricted areas exceeding licensee cleanup criteria. Samples range from 9 to 87 pCi/gram.
21. NPI 2006 annual report indicates continued uncontrolled radioactive material release into unrestricted areas

Current Operating Status of Neutron Products, Inc. (NPI) Materials Licenses

Outside of Scope

Out
of
Scope

- History of poor engineering practices and failure to control unsealed Co-60 resulted in an ongoing history of large-scale radioactive contamination in the facility; release of radioactive material into the local community via several environmental pathways; and additional impact from sky shine due to poor practices in waste storage.

Outside of Scope

Out
of
Scope

- NPI has been conducting a MARSSIM survey of the White House and Property. NPI plans to remove the contents of the White House and survey walls, floors and ceilings.

DRAFT

Outside of Scope

Out of Scope

- NPI exceeds soil concentration limits in the Dry Pond Area.

Outside of Scope

out of scope

- NPI failed to maintain releases of radioactive material to levels as low as reasonably achievable. Contaminated areas of the facility lack adequate containment necessary to prevent uncontrolled releases. Certain effluent pathways are not continuously monitored.

Outside of Scope

Out of Scope

- According to MDE, NPI continues to release radioactive materials into the environment in an uncontrolled manner. MDE regulations and NPI license conditions require, in part, that all soils, wherever found, contaminated by NPI licensed activities and exhibiting levels of Co-60 exceeding 8 pCi/g above background must be removed by NPI and properly stored/disposed as radioactive waste. In April 2007 and May 2008, Co-60 particles were identified on residential properties within one kilometer of the NPI plant. In November 2008 MDE inspectors collected six soil samples from the dry pond and adjacent areas. Laboratory analysis revealed soil concentrations ranging from 34-82 picocuries per gram (pCi/g) of Co-60. According to MDE, contaminated areas of the LAA lack adequate containment and effluent pathways are not continuously monitored.

CERTIFIED MAIL: NOTICE OF VIOLATION

Jackson A. Ransohoff, President
Neutron Products, Inc.
22301 Mt. Ephraim Road
P.O. Box 68
Dickerson, Maryland 20842

RE: Radioactive Material License #MD-31-025-01

Dear Mr. Ransohoff:

This letter refers to the radioactive materials inspection conducted by Messrs. Alan Jacobson, Bob Nelson, Alan Goldey and Ms. Fatima Adeyemo of the Maryland Department of the Environment's (MDE) Radiological Health Program (RHP) on May 6 & 7, 2010. The inspection examined radiation safety, compliance with conditions of your license, adherence to procedures and proper maintenance of records, interviews with personnel, general observations, and independent measurements.

During the inspection, certain activities were found to be in violation of the Department's requirements. The findings were discussed with Bill Ransohoff and Jeffrey Williams following the inspection. The violations found are listed in the enclosed "Description of Violations." In addition to the violations found, the RHP has identified the following concerns:

- Inspection findings revealed that NPI may not have sufficient trained personnel, financial resources and management commitment to decommission the Limited Access Area (LAA) in a timely, safe and predictable manner as required.
- The inspection team identified numerous repeat violations of the November 3, 2000 Montgomery County Circuit Court Order.
- NPI continues to release radioactive materials into the environment in an uncontrolled manner.
- NPI has still not submitted an adequate decommissioning plan.
- NPI management and their Health Physics Consultant have not been effective in correcting ongoing violations and concerns. These violations and concerns are not being

adequately addressed in either the monthly radiation protection audits or the annual review of the radiation protection program-content and implementation. The monthly audits and annual reviews failed to address the numerous illegal activities at the Dickerson facility and appear to provide only a minimal improvement to the radiation safety program at NPI.

- NPI continues to operate under a court order-permanent injunction without an approved decommissioning plan. Furthermore, NPI still has not implemented corrective actions necessary to comply with ongoing violations regarding soil concentration limits, releases of radioactive material, financial assurance for decommissioning and license termination.

As a result of these findings, you are required to take immediate action to correct the violations and to respond to this letter and the enclosed "Description of Violations" within twenty (20) calendar days of your receipt of this notice. Written statements should be provided for each of the violations indicating:

- a. Corrective steps, which have been or will be taken by you to remedy the present violations and the results achieved or anticipated;
- b. Corrective steps which will be taken to avoid further violations, who will undertake these steps, and who will supervise them; and
- c. The date when full compliance will be achieved.

"The violations identified in this notice may be subject to further enforcement actions, including but not limited to the following:

- (a) An administrative penalty of up to \$1000 per violation, not exceeding, \$50,000. Each day a violation occurs is a separate violation (Annotated Code of Maryland, Environment Article, Section 8-510);
- (b) A civil penalty of up to \$10,000 per violation, to be collected in a civil action in Circuit Court. Each day a violation occurs is a separated violation (Annotated Code of Maryland, Environment Article, Section 8-509(b))."

Please be reminded that Departmental compliance letters and licensee responses shall be posted pursuant to the requirements of the Maryland regulations, Section J.11 (d) titled, "Posting of Notices to Workers." If you have any questions concerning this letter, please call Messrs. Ray Manley or Alan Jacobson at 410-537-3301. You may also reach our office toll-free by dialing 1-800-633-6101 and requesting extension 3301. Also, you may contact this office via facsimile at 410-537-3198.

Sincerely,

Roland G. Fletcher, Program Manager IV
Radiological Health Program
Air and Radiation Management Administration

P.O. Box 68
Dickerson, Maryland 20842

RE: Radioactive Material License #MD-31-025-01

Certain activities conducted under your license were found to be in violation of the Code of Maryland Regulations 26.12.01.01 titled, "Regulations for the Control of Ionizing Radiation." These violations are presented below:

1. Section C.31 titled, "Specific Terms and Conditions of Licenses" and License Condition 22.B(2), require, in part, that all soils, wherever found, contaminated by NPI licensed activities and exhibiting levels of cobalt-60 contamination exceeding 8 picocuries per gram above background must be removed by NPI and properly stored/disposed of as radioactive waste. The Montgomery County Circuit Court Order-Civil Case 199036 (Montgomery County Circuit Court Order) dated November 3, 2000, requires NPI to comply with all of the current requirements of the applicable statutes, regulations and the provisions of the license. The Stipulation and Settlement of Civil Case No. 76639 in the Circuit Court of Montgomery County dated January 3, 1994, further required NPI to demonstrate compliance with these requirements by June 15, 1994.

Contrary to the above, NPI failed to remove cobalt-60 contaminated soil exceeding the above-specified limit. NPI failed to remove the contaminated soils from the areas exceeding the license limit. NPI has been in continuous violation of this requirement since May 23, 1989. For example, NPI still has not removed the soil contaminated with cobalt-60 from the adjacent railroad property to establish compliance with the 8.0 picocurie per gram concentration limit. Furthermore, several soil samples collected from the dry pond area and analyzed by NPI personnel during the calendar year of 2010 also exceeded this regulatory limit however these certain soil were not removed. On May 6, 2010 MDE Inspectors collected soil samples from the dry pond and adjacent areas. Results of laboratory analysis indicated that a soil concentration in the dry pond sample was 14 picocuries per gram, greater than 8.0 picocurie per gram. NPI has missed this June 15, 1994 deadline and continues to refuse to remediate this property.

2. Section D.101(a) titled, "Radiation Protection Programs" states that in addition to complying with all other provisions of these regulations, a licensee shall use all means to maintain radiation exposures and releases of radioactive material as low as reasonably achievable (ALARA). The Montgomery County Circuit Court Order requires NPI to comply with all of the current requirements of the applicable statutes, regulations and the provisions of the license.

Contrary to the above, NPI failed to use all means necessary to maintain releases of radioactive material as low as reasonably achievable. Specifically, NPI has failed to use means such as the adequate containment of radioactive materials, proper waste storage practices and regular shipments of radioactive waste, to a licensed repository. Soil samples from the dry pond area continue to exceed regulatory limits. As a result, NPI is not maintaining control over their radioactive material and it is continuing to be released.

3. Section C.31(c) titled, "Specific Terms and Conditions of Licenses" and License Condition 21.B require that, within 90 days of the issuance of the license, NPI must submit to the Department for approval, a comprehensive plan for disposal of all low level radioactive wastes in accordance with those specifications defined in this condition. The Montgomery County Circuit Court Order requires NPI to comply with all of the current requirements of the applicable statutes, regulations and the provisions of the license.

Contrary to the above, NPI's low level radioactive waste plan was submitted to MDE on December 10, 1999; however, upon review it was found to be inadequate and as of this date a comprehensive plan acceptable to the Department has not been submitted. Deficiencies in the plan were listed in a Departmental letter dated March 20, 2000, but NPI has not adequately responded to it. Specifically, the plan submitted by NPI did not include an adequate waste shipment schedule.

4. Section C.29(c) (2) titled, "Financial Assurance and Recordkeeping for Decommissioning" requires the licensee to submit a Decommissioning funding plan and financial assurance in accordance with dates and criteria set forth in this section. The Montgomery County Circuit Court Order requires NPI to comply with all of the current requirements of the applicable statutes, regulations and the provisions of the license.

Contrary to the above, NPI failed to provide an adequate decommissioning funding plan and financial assurance in accordance with the criteria set forth in this regulation. On October 20, 2000, the RHP received NPI's Decommissioning Plan dated October 27, 2000, which included a planned schedule for radioactive waste shipments. The RHP has reviewed this plan and determined that it is inadequate because it did not demonstrate compliance with the current radioactive material license waste disposal requirements and Section C.32 titled, "Expiration and Termination of Licenses and Decommissioning of Sites and Separate Buildings or Outdoor Areas.

5. Section C.29 (g) (2) titled "Financial Assurance and Recordkeeping for Decommissioning" states that that no person shall receive, possess, use, transfer, own, or acquire radioactive material of a type described in paragraphs (a) and (b) of C.29 for more than 180 days following the dates prescribed in the section for submittal of a decommissioning funding plan or certification, if the decommissioning funding plan or certification has not been approved by the Agency. The Montgomery County Circuit Court Order requires NPI to comply with all of the current requirements of the applicable statutes, regulations and the provisions of the license

Contrary to the above, NPI has still not met the financial assurance requirements. Furthermore, NPI's decommissioning funding plan has not been approved by the Agency. Despite NPI's failure to provide an adequate decommissioning funding plan, the company has continued to possess radioactive material of a type described in C.29(a) after the April 13, 1999 deadline. NPI has been in continuous violation of this requirement since April 13, 1999. NPI has refused to initiate the steps necessary to decommission the facility in a timely, safe and predictable manner as required.

6. Section C.32 titled, "Expiration and Termination of Licenses and Decommissioning of Sites and Separate Buildings or Outdoor Areas" requires, in part, that each licensee shall either begin decommissioning its site, buildings and outdoor areas in accordance with Agency requirements or submit a decommissioning plan within 12 months when the licensee's right to operate has been terminated either by court action or by action of law or regulation. Section C.32(g)(1) requires a licensee to complete decommissioning as soon as practicable but no later than 24 months following the initiation of decommissioning. Section C.32(g)(2) requires the licensee to request license termination as soon as practicable but no later than 24 months following the initiation of decommissioning. The Montgomery County Circuit Court Order requires NPI to comply with all of the current requirements of the applicable statutes, regulations and the provisions of the license.

In accordance with the above, NPI's right to operate in accordance with the 01 license was terminated by the Maryland Court of Special Appeals in December 2001. NPI failed to submit an adequate decommissioning plan in accordance with paragraphs (f) and (g) of these regulations. Furthermore, NPI has not yet begun to decommission the site, buildings and outdoor areas. Finally, NPI has still not submitted an adequate decommissioning plan in accordance with the criteria specified in paragraphs (f) and (g).
