Bob, Paul, Olga,

By letter dated July 10, 2014, as supplemented by letters dated July 17, July 22, July 24, July 26, July 28, and July 29, 2014, Florida Power & Light Company (the licensee) submitted a license amendment request for the Turkey Point Nuclear Generating Unit Nos. 3 and 4 (Turkey Point). The licensee requested revisions to the Turkey Point Technical Specifications (TSs), Sections 3/4.7.4, "Ultimate Heat Sink [UHS]," and 3/4.7.2, "Component Cooling Water System."

The U.S. Nuclear Regulatory Commission (NRC) staff reviewed the information provided by the licensee and determined that it needs additional information to complete the review. The NRC staff's request for additional information (RAI) is as follows.

SCVB RAI-5

In reference to SCVB RAI-3 from the NRC's email dated July 25, 2014 (ADAMS Accession No. ML14208A010), and the licensee's letter dated July 26, 2014 (ADAMS Accession No. ML14210A374), please provide the value of the maximum increase in containment pressure caused by the calculation errors.
