Subject: **Request for Status - Amendment #9 - NRC Lic #21-32816-01; Change to RSO**

Ms. Frazier:

Pursuant to our response to your questions, faxed and over-nighted on 17 July 2014, in regards to the above referenced Amendment #9 to our NRC License 21-32816-01, it would be appreciated if the NRC could provide a status report on the review and a timeline as to when Molecular Imaging might receive either: 1) action on the amendment or 2) further questions from NRC which need to be addressed.

As per the amendment, it is our intention to use a contracted consultant from West Physics as the Company's RSO. We have plans to use the consultant for a routine audit of our processes and would like to initiate this effort in the very near future and, if at all possible, with knowledge that the consultant is acting officially as our RSO.

Thank you in advance for any update NRC can provide. My email is [tludlam@molecularimaging.com](mailto:tludlam@molecularimaging.com) or, as when we last talked, feel free to call my cell phone, 614.403.3253.

Sincerely,

Tom Ludlam  
President/CEO
