Hi Elizabeth,

I have most of the information ready for your approval from our meeting of last week.

But in regards to your request for a copy of the quality manual from the factory: the ISO Procedures Manual takes up 12 binders of documents, and it is not in English. I don't feel that we really want that here. What do you think?

Also, the sensors will be here in Norcross today, Thursday 10/12. Are you available to visit Valmet tomorrow to install a Krypton source and perform some radiation profiles? I will be out of the office all of next week; and we do need to have this unit operational in our office for testing purposes.

You may phone me after lunch if you wish at 770-246-7218. I'll be back after 1:00 PM.

Best regards,

Jim
