KING OF PRUSSIA, PA 19406-2713

August 6, 2014

Docket No. 03020185
Control No. 584431

License No. 47-23023-01

Michael Duvall
President
Hobet Mining, LLC
P. O. Box 305
Madison, WV 25130-0305

SUBJECT: HOBET MINING, LLC; LICENSE RENEWAL; CONTROL NO. 584431

Dear Mr. Duvall:

This refers to your application dated July 16, 2014, for renewal of your NRC license. In accordance with the information in the application, the renewed license includes revised maximum possession limits for the radioisotopes authorized on the license. Security banners are removed from the renewed license because the revised possession limits do not require these banners to be included in the license. Enclosed with this letter is the renewed license.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

The NRC expects licensees to conduct their programs with meticulous attention to detail and high standards of safety and compliance. Serious consequences to employees and the public can result from failure to comply with NRC requirements, therefore you must conduct your program according to NRC regulations, the conditions of your NRC license, and the representations made in your application.

You are required to notify the NRC in writing of any change in the mailing address or change of ownership of licensed entity, and request termination of license when you decide to terminate all activities authorized under the license. NRC regulations also require that you request and receive an amendment to your license **prior** to: (i) acquiring licensed material in excess of the maximum possession limits, (ii) changing/adding location(s) of use, or (iii) changing the Radiation Safety Officer named on the license.

Your license expires on **August 31, 2024**. NRC regulations require that you either submit application for renewal of your license at least 30 days prior to the expiration date if you wish to continue licensed activities beyond the expiration date, or dispose of all licensed material and decommission your facility prior to the expiration date, and request termination of your license.

You will be periodically inspected by the NRC. Failure to conduct your program safely and in

accordance with NRC regulations, license conditions, and the representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, imposition of a civil penalty, or an order suspending, modifying or revoking your license.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Med, Ind, & Academic Uses**; then **Licensee Toolkits, see our toolkit index page**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 8:00 a.m. to 5:30 p.m. EST, Monday through Friday (except Federal holidays).

Thank you for your cooperation.

Sincerely,

Original signed by Sattar Lodhi
