Regulatory

Serial: NG-75-212

Mr. Edson G. Case, Acting Director
Directorate of Licensing
Office of Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20545

50-261

Dear Mr. Case:

H. B. ROBINSON UNIT NO. 2
LICENSE DPR-23
CORRECTION OF SUBMITTED DATA IN
SECOND REFUELING OUTAGE SUMMARY REPORT

On October 7, 1974, Carolina Power & Light Company submitted a report entitled "H. B. Robinson Unit No. 2 - Second Refueling Outage - Summary of Events of Interest," which was provided at the request of the Directorate of Regulatory Operations. During subsequent inspection of figures included in the report, it was discovered that several graphs pertaining to safety injection system performance were deficient in that values of the ordinates and abscissas were missing or erroneously labeled. To correct this deficiency, we hereby submit revised Figures 1 through 4 of the subject report with the proper information.

In addition, we have added an additional system delivery curve to Figure 4, Injection to Reactor Coolant System, to show the degraded delivery for the LOCA sensitivity analysis presented in our submittals of September 7, 1973 and January 4, 1974. You should replace the original figures in your copies of the October 7, 1974 report with the figures in this submittal.

Yours very truly,

E. E. Utley
Vice-President
Bulk Power Supply
