Mr. George Lear, Chief
Operating Reactors Branch #3
Division of Reactor Licensing
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Lear:

H. B. ROBINSON UNIT NO. 2
LICENSE NO. DPR-23
INTEGRITY OF SWING-CHECK MSIV'S

In your letter of May 30, 1975, you requested that Carolina Power & Light Company provide you with summary information on analyses or tests that have been performed to confirm the integrity of swing-check main steam isolation valves under steam line rupture accident conditions for our H. B. Robinson Unit No. 2 plant. We have contacted the valve manufacturer, Schutte and Koerting, as well as the plant architect-engineer, Ebasco Services, and have determined that no analyses have been performed under accident conditions for these valves. As a result, we have contacted Ebasco Services, Inc. to provide an analysis to determine if the valves are suitable for continued service without modification or replacement. The results of the analysis will not be compiled until September 15, 1975, and allowing for our review and preparation of documentation for submittal to the NRC, we request an extension of the submittal date for the information requested in your letter until November 1, 1975. This will also allow us to determine the extent of modification and the schedule for completion if the analyses show modifications are required.

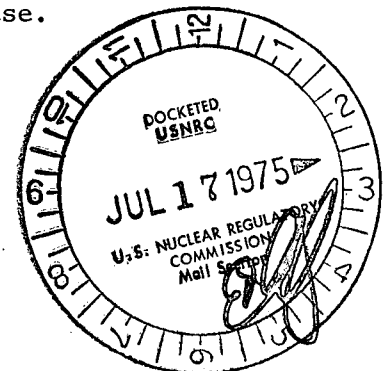

We trust this information is suitable for your use.

Yours very truly,

E. E. Utley
Vice-President
Bulk Power Supply
