STEAM GENERATOR TUBE PLUGGING LIMITS

Dear Mr. Reid:

In response to your letter of March 4, 1977 on steam generator tube plugging limits, CP&L will prepare a supplement to our November 4, 1976 submittal. We are presently working with the Westinghouse Electric Corporation to collect the necessary data to demonstrate that a plugging criterion of at least 50% is acceptable. This data will be submitted by April 25, 1977.

Yours very truly,

E. E. Utley  
Senior Vice President  
Power Supply

CSB/gsm
