H. B. ROBINSON STEAM ELECTRIC PLANT, UNIT NO. 2
DOCKET NO. 50-261
LICENSE NO. DPR-23
STEAM GENERATOR TUBE PLUGGING LIMITS

Dear Mr. Reid:

Our letter of March 29, 1977, informed you that CP&L would prepare a supplement to our November 4, 1976, submittal. Preliminary results appear favorable for justification of a 50% plugging criterion. However, this work is taking somewhat longer than originally expected. Therefore, CP&L hereby requests a delay until June 24, 1977, for our final response to your letter of March 4, 1977. Since the Robinson unit does not have a scheduled outage until November of this year, the requested delay will not adversely affect the required staff review prior to the refueling outage.

Yours very truly,

E. E. Utley
Senior Vice President
Power Supply

CSB/dkm
