H. B. ROBINSON STEAM ELECTRIC PLANT UNIT NO. 2  
DOCKET NO. 50-261  
REQUEST FOR INTERIM TECHNICAL SPECIFICATIONS

Dear Mr. Reid:

On June 21, 1977, Carolina Power & Light Company received your letter dated June 16, 1977, asking that we resubmit proposed interim Technical Specifications for fire protection equipment within 20 days. Because of the extensive efforts required by Company personnel by simultaneous fire protection reviews of both our Brunswick and Robinson Plants by the NRC regulatory staff, we will not be able to devote the necessary time to a review of the staff position that accompanied your June 16 letter and still respond within the 20 day period. Since the material involved is of significant importance to the protection and operation of the plant, we hereby request that the date for responding to your June 16 letter be extended to August 8. We have discussed with the Robinson Project Manager at NRC our need for extension beyond July 11. In the event we are able to complete our review prior to August 8, our submittal will be made as soon as possible.

Yours very truly,

E. E. Utley  
Senior Vice President  
Power Supply

MFP/c11
