Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission

RE: H. B. ROBINSON STEAM ELECTRIC PLANT  
DOCKET NO. 50-261  
OPERATING LICENSE NO. DPR-23

Dear Mr. Rusche:

Enclosed are copies of a retyped version of H. B. Robinson Technical Specifications. The Company requests that this version be issued to replace the present Technical Specifications.

Because of the former NRC procedure of issuing pen and ink changes to the Technical Specifications, it has become increasingly difficult to administer controlled copies of the Technical Specifications within the Company. There are no changes included in the enclosed retyped version, however, we request that the NRC review these specifications and issue them as a replacement to the existing specifications. We request this action in an effort to standardize the format between the NRC and the Company and to ensure that future changes to the Technical Specifications are adequately controlled and administered by the Company.

Should you require additional copies of these Technical Specifications, please contact us.

Yours very truly,

E. E. Utley  
Vice President  
Bulk Power Supply
