Feb 2014. Already expired. We're using an extension letter for now.

Steven

Hi Steven

I understand your scheduling needs and we will do our best to get the KI to you in a timely delivery. Unfortunately I cannot guarantee delivery. This order of tablets is quite large and is being sent in two shipments- August and September. We are trying to arrange the deliveries so that a State receives all of its KI in one shipment- so there would be one lot number, expiration date etc. rather than two shipments etc. Let me see where you are in this queue. What is the expiration date of the current tablets?

Thanks
Trish

Ms. Mulligan,

Thanks for the update. We will be changing out our emergency worker kits during the last two weeks of September. We'd like to have the KI before then. Would it be possible for Washington to get their KI during the end of August or first 10 days of September?

Sincerely,
Steven

Subject: KI Delivery Update

Hello,

I cannot believe that it is already August. I hope everyone has been enjoying their summer. The KI has been ordered and is expected sometime in late August to early September. The tablets are made in Sweden and shipped to the US. The allotted time from order to receipt is usually about 90 days, and frequently less. However, because they are made outside of the USA, they need to clear not only US Customs but also clearance from the FDA inspectors. The tablets are then delivered in bulk to HHS for repackage and final shipment. As soon as we have the expected dates for shipment to you we will let you know. If there have been any changes in the delivery information or if you need a specific date or time range for delivery please let us know ASAP so that we can ensure that your KI delivery proceeds as smoothly as possible.

Thank you for your patience.

Best regards,

Trish
