Subject: Pilgrim Nuclear Plant

-

We are full time residents of Wellfleet Mass. and very concerned about then continued operation of the outdated Pilgrim Nuclear Plant in the face of excessive shutdowns for malfunction. It now stores 4 times as many spent fuel rods as the plant is designed for and is rated as one of the 9 worst such plants in the nation .

If something should happen to cause an accident—whether by plant malfunction, sabotage, attack by air , or natural , but catastrophic event- to cause release of

radiation or meltdown, there is no way to escape to a safer place.

All 15 towns on the Cape and the Islands have voted to shut down Pilgrim, and we urge you to make this a priority.

DAVID AND SHIRA SANDS
