RE: Control No. 584446
License # 37-20647-01

Dr. Lodhi:

This letter serves to follow-up on our phone conversation on 8/7/14 regarding our request to amend our license (#37-20647-01) to remove our Nuclear Density Gauge storage location in New Haven, CT. In order to release this location, you requested that we certify that the gauges stored at this location have never had a leaking source.

We have reviewed the leak test records for the gauges and time frame that the gauges were stored at this location. All of the leak test certification reports indicate that there were no leaking sources while gauges were stored at the 424 Chapel St, New Haven, CT location.

If you have any questions or require further information, please contact Dave Albright, CIH, CSP, Radiation Safety Officer at 717-763-7212.

Very truly yours,

GANNETT FLEMING, INC.

Thomas B. Pursel, P.E.
