Subject: Additional Information
Attachments: Request for Additional Information ECS.PDF

As we discussed by telephone, please submit your response to the attached request for additional information so we can complete the review of your amendment request.
Bill Reichhold

We need the following additional information to complete our review of your request to put your NRC license on "standby" status.

License Status Change to Standby

1. Please confirm that you never have received, possessed or used any licensed materials authorized by your NRC license.
2. Please confirm that you are not conducting any activities for which the license was issued, but you have not yet decided to permanently cease operations.
3. Please identify who will be the responsible individual for the license while your NRC license is in "standby" status and how to contact that individual.
4. Please confirm that you understand that after your license has been put in "standby" status, you must amend your license before receiving, possessing, or using any licensed materials authorized by your NRC license.

Name Change

1. Please review the "Transfer of Control" information and NUREG-1556, Volume 15 to determine if the change in the name is only a name change or an ownership change. A copy of NUREG-1556, Volume 15 may be found on the NRC website at <http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v15/>.
2. Please confirm that the change in the name of the licensee **is only a name change** and not any ownership change.
3. Please explain why there was a name change from ECS Engineering, LLC to EnStrata Pros, LLC.

Please send a facsimile (630- 515-1078) of your response to the above within 14 days and state, **Response to Control 584140**. Please include a cover letter on company letterhead, dated and signed (signed by an individual who is authorized to sign official documents on behalf of the licensee) with your response letter. You may also scan your response letter and send it to me by e-mail in PDF file format to william.reichhold@nrc.gov.

Please call me at 630-829-9839 if you have any questions.

From the desk of:

Bill Reichhold

Change of Control Information

Control: Control of a license is in the hands of the person or persons who are empowered to decide when and how that license will be used. That control is to be found in the person or persons who, because of ownership or authority explicitly delegated by the owners, possess the power to determine corporate policy and thus the direction of the activities under the license.

Transferee: A transferee is an entity that proposes to purchase or otherwise gain control of an NRC-licensed operation.

Transferor: A transferor is an NRC licensee selling or otherwise giving up control of a licensed operation.

Licensees must provide full information and obtain NRC's **prior written consent** before transferring control of the license. Provide the following information concerning changes of control by the applicant (transferor and/or transferee, as appropriate). If any items are not applicable, so state.

1. Provide a complete description of the transaction (transfer of stocks or assets, or merger). Indicate whether the name has changed and include the new name. Include the name and telephone number of a licensee contact who NRC may contact if more information is needed.
2. Describe any changes in personnel or duties that relate to the licensed program. Include training and experience for new personnel.
3. Describe any changes in the organization, location, facilities, equipment or procedures that relate to the licensed program.
4. Describe the status of the surveillance program (surveys, wipe tests, quality control) at the present time and the expected status at the time that control is to be transferred.
5. Confirm that all records concerning the safe and effective decommissioning of the facility will be transferred to the transferee or to NRC, as appropriate. These records include documentation of surveys of ambient radiation levels and fixed and/or removable contamination, including methods and sensitivity.
6. Confirm that the transferee will abide by all constraints, conditions, requirements and commitments of the transferor or that the transferee will submit a complete description of the proposed licensed program.
7. Provide documentation that the transferor and transferee agree to the change in ownership or control of the licensed material and activity, and the conditions of transfer; and the transferee is made aware of all open inspection items and its responsibility for possible resulting enforcement actions.
